

# Atalib Ag Almousleck

I am Atalib, Master Student in Software Engineer

✉ almouslecka@gmail.com 📞 +86 130 2720 7507 📍 West Anhui University, 15883 Lu'An

## Education

### Bachelor in Computer Science and Technology

Apr 2018 - Jan 2022

Jiangxi University of Technology, Nanchang

From March 2018 I started my Bachelor journey in China, in The first semester I was introduced to Chinese Culture and language followed by the second semester where I started with mathematics (Calculus 1) and C Programming language and more ... in the third semester we went down to web development and kept doing mathematics (Calculus 2) and some own research on the CMS (WordPress) followed by the fourth semester, in the fifth semester we started learning Java, and some topics around it, in the sixth semester we entered Java more advanced topic, Foundation of Information systems, Professional Communication Skills and so on, the seventh semester there were Business Statistics, Mobile UI Design, Smart operating System, Java web Programming Technology (JSP) and much more, for the last which was pretty free I was doing my own research in some topics like Backend development, Java/Spring Boot and my thesis. That's it.

## Employment

### Software Developer( Flutter/Dart || Java/Spring Boot)

Oct 2021 - Jan 2022

Developed and maintained backend systems for an eCommerce website

## Profile

Master Student in Software Engineer with 2+ year hands-on building and maintained backend for Web/Mobile applications. Possess experience with 3+ programming languages, particularly skilled in Java and Nodejs. Seeking to use my backend development experience in an entry-level position as a Software developer.

## Internships

### Backend Developer

Oct 2021 - Jan 2022

• Used Nodejs/Express and MongoDB database to develop a productivity eCommerce API for Android/iOS to help architects render and edit blueprints

## Personal details

Date of birth

January 10, 1997

Place of birth

Mali

Gender

Male

Nationality

Malian

## Skills

Java/Spring Boot

Nodejs/Express

HTML/CSS/JS

WordPress

Dart/Flutter

## Languages

English

- Worked with the development team to refine the debugging process
- Leveraged my knowledge of BackEnd developer to write code to manage backup log data
- Fixed bugs in existing apps, contributing to an overall 10% reduction in customer complaints
- Helped implement a new process to streamline communication between the development team and operations

---

## Achievements

I have been creating several applications and web applications, some still locale(only on my laptop) and some hosted on Hostinger with different programming languages like Java, Node.js/Express, Dart, and CMS like WordPress.

. Created an E-commerce called weShop using Node.js, and MongoDB databased and published it on Hostinger Created my own website portfolio called atalibdev.com hosted on hostinger. Created my website blog using CMS(WordPress) where I publish some technologies related Backend and Rest API called techwithatalibdev.com online(soon it'll stop showing as the hosting is about to expire) created much more projects but as I didn't publish anywhere still in my local machine, I won't mention it here. Working right now on building Microservices and Distributed System with Spring boot and Spring Cloud. I also wanna start learning Golang.

---

## Courses

**Dart/Flutter** Feb 2022

I have been amazed by how ease flutter & dart create an application, then I decided to put my hands on Google's framework flutter.

**100 Days Of Code - 2021 Web Development Bootcamp** May 2021

Becoming a web developer is a great choice because web development opens up many career paths and web development skills are required in pretty much every business that exists today - and of course this will also increase me in the future!

**Microservices and Destributed Systems** May 2023

As microservices are becoming increasingly popular, more and more organizations look to adopt them in order to improve their software development processes. In turn learning, microservices can help me to improve my career prospects and earning potential.

---

## Certificates

**Java Programming Masterclass for Software Developers** Jan 2019

As my learning of Software development (BackEnd development)

French

Chinese

## Hobbies

■ Coding

■ Reading

■ Basket

choosing Java as the first language is a great choice so i decided to enrolled in a Java course that can help me to better understand this amazing beautiful programming language.
