OBJECTIVE

Master degree in Software Engineer with 4+ years of experience in Full Stack Java Developer with a strong foundation in software engineering and hands-on experience in Java, Angular, Flutter, Firebase, and React. Passionate about building robust and scalable Micro services API, web and mobile applications. Seeking to leverage academic knowledge and project experience to contribute effectively in a full-time development role. To see more about the projects i have done please see my [portfolio](#)

EDUCATION

Master of Software Engineering , Southwest University of Science and Technology Expected June 2025
Relevant Coursework: Cloud Computing, Software Architecture, Mathematics, and Software Quality.

Bachelor of Computer Science, Jiangxi University of Technology 2019 - 2022

SKILLS

Programming Languages:	Java, JavaScript, Golang, Dart
Frontend Technologies:	HTML, CSS, Angular, React
Experience with databases	PostgreSQL, MongoDB, Firebase
Experience with Tools and Platforms	Git, Docker, Jenkins, AWS
Mobile Development:	Flutter

LANGUAGES

English: Fluent French: Fluent Chinese: Good

EXPERIENCE

Role Name	Nov 2021 - Dec 2021
Company Name	NC - Jiangxi
<ul style="list-style-type: none">Achieved two month internship at the end of my bachelor degree as a Backend developer using Java Spring Boot.	

PROJECTS

Mobile E-commerce Application (Flutter, Firebase) Developed a fully functional mobile e-commerce application using Flutter for cross-platform compatibility. Integrated Firebase for backend services including authentication, real-time database, and cloud storage. Implemented features such as user registration/login, product browsing, cart management, and order tracking. Please check out the git link ([Try it here](#))

Personal E-commerce Website (React, Node.js, MongoDB) Designed and built a responsive e-commerce website using React for the frontend and Node.js with Express.js for the backend. Utilized MongoDB for data storage and managed user sessions, product listings, and payment processing. Please check the git link [See here](#)

Inventory Management System (Java, Spring Boot Microservices, Docker PostgreSQL keycloak) Developed an inventory management system designed for small to medium-sized businesses, utilizing **Java** and **Spring Boot** to create a robust microservices architecture. I have Implemented **RESTful APIs** across multiple microservices for handling inventory operations such as product tracking, order processing, and reporting. Integrated **PostgreSQL** as the relational database for secure and efficient data storage, ensuring ACID compliance and complex query support. Utilized **Docker** for containerization of microservices, enabling consistent development and deployment environments, and simplifying scaling and maintenance. Implemented **Keycloak** for user authentication and authorization, ensuring secure access management with features like Single Sign-On (SSO) and multi-factor authentication. please see the git link [See here](#)

Book Social Media Application (Java, Spring Boot, Angular, Docker, PostgreSQL, Keycloak, CI/CD)

I do have Developed a full-stack social media application for book enthusiasts using **Java** and **Spring Boot** for the backend, and **Angular** for the frontend. Implemented features allowing users to borrow, read, and return books, while authors can create accounts and publish their works. Using **PostgreSQL** for data management, ensuring secure and efficient handling of user and book-related data. Integrated **Keycloak** for robust authentication and authorization, securing the application with **JWT** for token-based security. Deployed the application using **Docker** containers, facilitating smooth and consistent deployments across different environments. Implemented a **CI/CD pipeline** using tools like Jenkins, automating the build, testing, and deployment processes, ensuring rapid and reliable delivery of new features and updates. Please check the git link [See here](#)

EXTRA-CURRICULAR ACTIVITIES

- Regularly write and publish articles on programming topics including **Spring Boot**, **Flutter**, **Java**, and other software development technologies. See the link [medium](#)
